Invitation

23 march 2011

Dear colleagues, friends!

It is my pleasure to invite you to take part in the conference dedicated to the 90th anniversary of Main administration for service to the diplomatic corps.

The foot deformities surgery past years has turned to one of the most interesting, demanded and dynamically developing areas of orthopedy. It's an honour for us to realize that our clinic is the pioneer of the percutaneous foot surgery in Russia, thus we choose this area of medical science and invited leading experts to share their experience in percutaneous and minimally invasive foot surgery.

We would like to see among the participants of our conference adherents of various orthopedic schools, create good conditions for work and dialogue.

The conference will take place at unique residence of Savva Morozov, in the heart of Moscow. I hope that meetings surrounded by ancient gobelins and a knightly armor will leave a trace in your hearts for many years.

Director
